If you're looking for the best keyboard to unleash your creativity, look no further than the Yamaha PSR S-910. Offering up an immense range of voices, realistic accompaniments, and quality sounds that you can customize to your exact needs, this particular model is perfect for any musician who wants their playing experience to be as close as possible to their ideal vision. The keyboard's built with a number of features in order to ensure that it will remain excellent over time. It includes a solid wooden frame and metal stand for stability when sitting upright on top of a desk or table. This is important because it will help significantly to keep the keyboard from getting damaged while you're actively using it. It also includes a long cable and sustain pedal for added playability and control while playing, and the USB connection makes it easy to connect to computer-based recording software. It also comes with a useful stand, and its input capacity of 10 different tracks make the S-910 an excellent choice for one who wants their music to really shine larger than life. With HD Audio that provides a dynamic range of clarity larger than you've ever heard before, this keyboard supports over 1000 different voices that are completely customizable. The variety of sounds can be altered by yourself further by way of the Yamaha's "Sound Library Manager" software that allows for the rearranging and editing of sound parameters. The S-910 also includes a recording function that will let you use its integrated microphone to start composing songs - except this time, the keyboard isn't needed at all.
